Risks			

June 2015

FINANCIAL OVERVIEW & KEY RISK AREAS

DP Income

Year to date actual income is £4.159M which is within 1% of budget year to date for June. Given that we are so close to forecasted budget year to date, the full year forecast of £18M is deemed appropriate to remain as the full year forecast moving into quarter 2.

Cash Underspend

Underspend continues to be a risk. At the end of quarter 1, income is exceeding costs by £300k. At this stage, it is difficult to assess if this is a true underspend or due to the timing of expenditure, however if we continued to spend at this rate, a material underspend is a key business risk.

We will continue to diminish this risk by:

- Review of income forecasts each month for accuracy/ prudence
- Fee income strategic work around how we set our fee levels
- Isolate key spend areas or projects that could be accelerated or put on hold for a quick turnaround if our environment changed with little notice
- Balance sheet reporting and cash flow reports are being developed and will be available once the purchase management system has been installed – expected to be in place by late 2015.

Staff Recruitment

Staff costs pose a significant risk to the business if recruitment cannot keep up with budgeted staff levels. There is a large scale recruitment drive underway which continues to diminish the risk of a material underspend. Staff costs are £31k under budget, which represents only 1%.

Due to the decision by HM Treasury that specific approval should have been sought for the Deputy Commissioner salary increases, an administrative fine of £18,400 has been imposed and will be recognised within this financial year. This will be budgeted for within salary costs from BV2 onwards. Retrospective approval was given and a briefing note included in the 2014/15 annual report.

Capital Spend

Our 'allocated' capital budget has now been informally confirmed as £850k (formal approval to follow at Budget Version 2) which is a very positive outcome following a month of uncertainty. Although this is a real achievement, we have been assured that this is unlikely to be available in coming years. As such, we need to start planning how we can negotiate

with the MOJ on this issue or else what kind of business model we can realistically operate with a minimal capital budget.

Budget Version 2

Budget version 2 will be submitted to the MOJ at the end of July and will be internally reported on from July management reports onwards.

Budget Review Update

Budget reviews appear to be well received and more and more engagement is seen from budget holders as they get to grips with their monthly reports and how best to interpret the information.

Purchase Management System

Initial planning work has started on the purchase management system; work is expected to start later this month. Final delivery on the project may be delayed slightly subject to third party resource availability however this is considered to be a minimal risk to the business and financial output.

INCOME

Grant-in-aid for freedom of information activities

The grant-in-aid available for drawdown over 2015-16 has been confirmed at £3.7M, the first tranche of £938k has been drawn, three further drawdowns are expected in July, October and January of £921k each.

Data Protection fees processed

The chart below shows the actuals vs our current budget for the year 2015/16.

The year to date fee payment method split is shown below, showing a definite trend towards credit card payments (↑ 5%) and away from cheques (↓ 5%) from the average over 2014/15. Direct Debits and BACS payments remain consistent to 2014/15.

EXPENDITURE

Spending controls

The ICO is complying with the Cabinet Office Spending Controls Guidance v 4.0

<https://www.gov.uk/government/publications/cabinet-office-controls/cabinet-office-controls-guidance-version-40>

We are also required to obtain specific MOJ approval for any IT or communications spend over £50k for individual projects. We will only be required to report spend over £50k not included in the original budget. No such spend has occurred to date.

Total office costs

There are quite a few categories within office costs that are over or under budget, as this is the first year we have separated out all of the distinct categories, the budget needs further work to make sure that each category is sufficiently resourced. Overall the budget is within 3% and not considered to be a risk of material over or underspend. This will be monitored closely going forward.

Total staff FTE report and costs

Staff costs have come in £31k below forecasts for June (£83k underspend in May). This is testament to the large scale recruitment drive across the

business mitigating the risk of under-resourcing. From the FTE compliment report (at the bottom of management report); there are 14.4 vacancies at present, the majority of which are due to be filled in July. There are a further 30 vacancies budgeted to be starting in September so that will be a key month for monitoring any risk of being under compliment and budget.

Training and Recruitment

Recruitment is over budget by £8.5k, largely due to the costs of recruitment of a new deputy commissioner. There are also some minor underspends amongst training, although expectation is that the overall spend will be to budget.

IT Costs – Service Delivery

IT spend overall is to budget (within 4%), there are some minor fluctuations against budget lines where the spend is determined by usage – printing usage and telephony, which is to be expected.

Considering the major business impact of the IT incident in May, the actual realised costs (outside resource downtime) have been kept to a minimum and have been estimated at less than £15k. This additional cost has been swallowed up by savings made against other IT budgets such as security and printing and is therefore not expected to cost more than the planned IT budget.

IT Projects

There is a small underspend within IT projects of £29k (20%). This is due to the IT incident taking up all resources although it is not expected to have any long term impact on the annual budget spend.

Communications Spend

There is further work that needs completing within the communications budget overall with budget profiling and how items are coded to budgets. This sort of under and overspends should be reduced once we have implemented the purchase management system whereby budget holders code their own orders rather than finance selecting the most appropriate code. Overall, despite a 14% underspend at this stage, the communications budget is expected to spend to date.

Banking, finance & audit costs

Finance costs are as expected.

Staff travel

Overseas travel is higher than expected across the executive, policy delivery and enforcement teams; however this is expected to decrease over the summer months where travel costs are historically reduced.

Legal, professional & other

Legal is expected to spend to budget but can fluctuate according to case load.

Other costs relating to library and subscriptions tend to be front loaded hence the immaterial overspends across each category. This is not considered to be of risk.

A research budget should be recognised and recommendation is that it should be built into the budget version 2.

The additional amount of £13k spent on professional services is largely down to much higher forensic activity than usual within enforcement and there is a £10k system charge within the HR department that was budgeted for in 2014/15 rather than current year and will therefore need recognising in budget version 2.

CAPITAL EXPENDITURE

There is c. £40k of capital spend to date on the Data Storage Solution.

Civil Monetary Penalties

The current debtor of CMPs owed to the ICO as at 30 June 2015 is £60,000.
